IMPROVED USER EXPERIENCE WITH SAP FIORI

**Experis® Solutions** ManpowerGroup

SAP Fiori

The concept of user-centred design focuses on how the employees work, the business processes they operate, and offers the following benefits:

- **Increased productivity:** Faster and more direct access to relevant information and applications
- **Smart notifications** and **warnings,** which involve transparency in the elements that need your attention
- **Help** for users on what to do next
- **Allows** the users **to take rapid** and informed **actions**
- **Increased user satisfaction**

SAP FIORI

SAP Fiori is the new user **experience** in which SAP has redefined the way that business users work. With a **new look** and new **visual design,** it makes the work more attractive and prepares the **next generation workforce.**
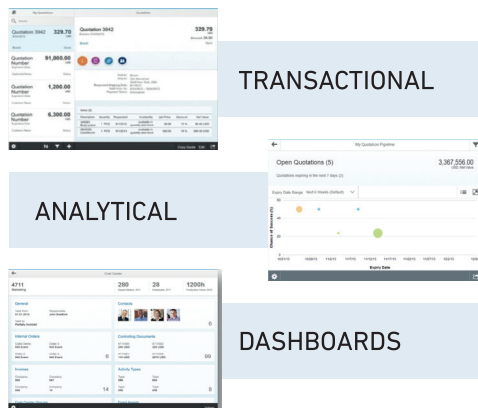

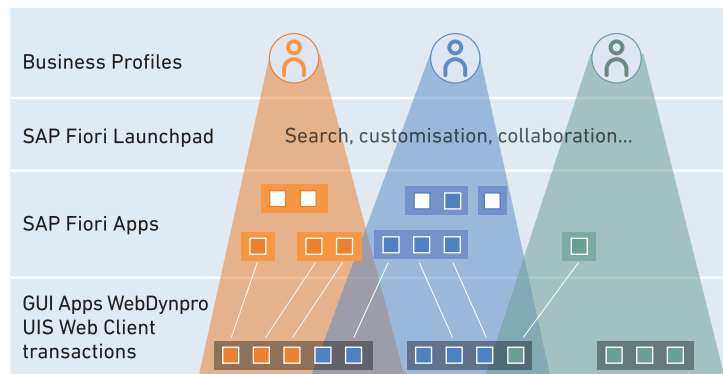

FIORI LAUNCHPAD

Is the entry point for SAP Fiori. Its design is role-based, being highly **customisable**, and delivering **real-time data. This is the single-entry point** to the different SAP products so that SAP Fiori is part of the SAP ECC, SAP S/4HANA, SAP Integrated Business Planning, SAP C/4HANA, and SAP SuccessFactors solutions. It is also expected to be introduced into other SAP products in the future.
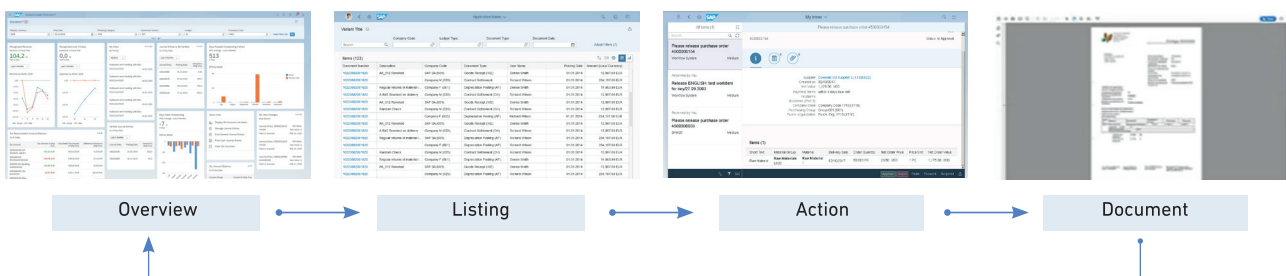

SAP Fiori offers us…

Three types of applications

TRANSACTIONAL

ANALYTICAL
